RECYCLABILITY STATEMENT

We hereby declare that **SPEED E family** offset papers, manufactured by MM Kwidzyn sp. z o.o., are fully recyclable and comply with EN 13430:2004. Packaging - Requirements for packaging recoverable by material recycling. Fully recyclable means that 100 % of material is recyclable.

Additionally we inform that :

1. SPEED E family papers are made of ECF bleached kraft pulp. Fibers from deciduous trees are mainly used in Speed E papers production process. Moreover, in the raw material composition of these papers are fibers from coniferous trees, mineral filler, binders and small amount other additives. Binders used to increase internal and ply bond and increase surface strength: native and modified starches.

No functional layer is added to the base structure.

2. SPEED E family papers contain 77,5% (*) of plant derived biodegradable materials and 22% of mineral filler – precipitated calcium carbonate(**). Synthetic materials use to control water absorption, to enhance paper brightness and to reduce fiber loses, altogether represent less than 0,25 % (*) of total paper weight.

3. SPEED E family papers don't contain:

- Post-consumer waste material (PCW)
- Post-industrial white recycled fibers (PIW)
- SVHC (substance of very high concern)
- Nature hazardous materials.

(*) - Moisture is excluded in this calculation

(**) – Carbon dioxide used to produce precipitated calcium carbonate (PCC) is also from renewable resources, because is coming from CO2 sequestration.
