Safety data sheet for paperboard (MSDS)

Material safety data sheets have to be provided by suppliers of substances or preparations according to REACH Regulation (EC) No 1907/2006 as amended.

MM BOARD & PAPER manufactures paper and cartonboard. Paper and cartonboard are neither substances nor preparations in the sense of REACH Regulation (EC) No 1907/2006 as amended, but articles.

Additionally paper and cartonboard do not appear to emit hazardous chemicals under the conditions of our understanding of normal manufacturing or conversion into finished products.

Therefore, safety data sheets are not required and cannot be provided.

On behalf of
MM BOARD & PAPER

Dr. Sigrid Gerold
Head of Group Product Safety & Quality
